

# toxic concerns

In a time where again we are horrified to learn of Hospitals losing the battle against super bugs and C Dif being responsible for killing even more patients, AND a report on the alarming amount of toxins being used in cosmetics, (*even so called Natural ranges*) We have to ask the following questions:

- What products will destroy and prevent super bugs?
- What cosmetics are safe and natural to use?
- Are there products that will KILL and prevent super bugs *and* detox your skin?

The answer is yes...if you can harness the power of OXYGEN!

Firstly, let's look at toxins.....

## how toxic are you?

Channel 4's programme "How Toxic Are You?" highlighting the fact that many of chemicals used in everyday cosmetic products are liable to stay in your body for years.

The long term effect of this toxation is unsure but should we be risking our health for the sake of beauty.

To quote the programme:

*"We're made of chemicals, we rely on them, they're the basis of life. But the wrong types, in the wrong concentrations can cause serious damage."*

if it's not Karin Herzog, it's *not* Oxygen Therapy

We are growing more aware of the “additives” used in our foods and the move towards more organic and environmentally friendly products is increasing. So isn't it time we sat up and took notice of what we are putting onto our skin?

**The only thing your skin needs to destroy toxins is Oxygen! Karin Herzog oxygen creams are the only proven formulas to contain active oxygen in a cream.**

**So, what about Super bugs?...**

## Karin herzog a medical history

Developed by eminent Scientist, Dr Paul Herzog, as a hand sterilizer for surgeons hands, these products have since become very popular in many sectors including the world of cosmetics, but all of the formula's success is based on a medical science.

Manufactured in Switzerland, Karin Herzog's Oxygen products were the first and are still are the only products that have the ability to 'trap' active Oxygen in a water based cream (Hydrogen Peroxide - H2O2).

This unique fixing ability is medically proven and holds 2 world patents.

## how does herzog work?

The method the cream uses to delivers Oxygen and water into the skin based on scientific and medical fact.

When the formula comes into contact with Catalase - a protein present in everyone's skin - the water and Oxygen are separated and the Oxygen returns to its natural state, a gas.

The Gas cannot escape from the cream as it is fixed, and so is forced down into the dermis along with the water. This transition is unique and no other cream has the ability to replicate it's success

### **So why are these very serious creams available in the beauty industry?**

Put simply, Beauty depends on health.

And again, we are back to the many natural attributes of Oxygen:

- ✓ Collagen production is Oxygen dependant.
- ✓ Oxygen kills bacteria so Acne and breakouts soon disperse.
- ✓ Dry skins need water and Oxygen to increase hydration.

- ✓ Oxygen is Anti Viral and Anti fungal.
- ✓ Oxygen will calm and desensitise even the most stressed skins.
- ✓ As the creams contain active Oxygen
- ✓ All Karin Herzog oxygen creams are 100% preservative free.

The list goes on and on...

Let's not to forget, Herzog is totally safe to use along with any other brands, just apply a Karin Herzog oxygen product first to help maximise results.

**Karin Herzog is available from many authorised Spa's and Salon's and is also available on line.**
